The first step to treating /r/ speech sound disorders is to Evaluate and Screen

The Entire World of R™ Advanced Screening Assesses 947 /r/ Words

The Advanced Screening for /r/ is the most comprehensive and advanced screening for vocalic /r/ ever created. Know exactly which vocalic /r/'s (r-controlled vowel) and in which context your students are having difficulty. Complements the protocols from The Entire World of R Book of Elicitation Techniques. Comes with pad of 30 (11x17") forms, student copies, results forms and Elicitation Probe for all consonantal-vocalic combinations. Screening all 32 different /r/'s --vocalic, blends, prevocalic (initial) and /r/. Includes lots of forms for easy assessment of /r/ articulation disorders.

how to Remediate /r/ articulation disorders

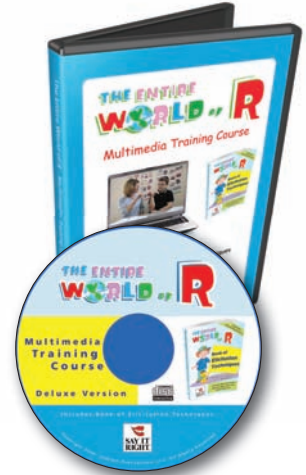

The Entire World of R™ Multimedia Training Course

Want to learn about evaluating and treating /r/ in a lively and interactive manner? How about seeing and hearing real world examples of students being treated by experts? This course is it!

We've taken everything we know about /r/, condensed it down and packed it full of real-world examples. Contains numerous videos of 15 real students being evaluated and treated using The Entire World of R™ so you can learn how to best implement the protocols and strategies yourself.

The Advanced Screening for R and Choosing a Target Check List are included with all courses. Also contains a section on "ear" training/hearing /r/ sounds.

The course is self-paced for individual use, but would also be great as a group training. This course is for any SLP that works with clients with /r/ articulation disorders. Deluxe edition contains a digital copy of The Entire World of R™ Book of Elcitation Techniques. Windows only.

The Entire World of R™ Secret Message

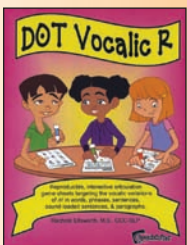

This book has been developed to help the student develop mastery of the /r/ variations while learning basic, everyday puzzles.

It is suggested that the student with the /r/ speech sound disorder be given the Entire World of R™ Comprehensive /r/ screening to determine which of the 32 variations of /r/ he has not mastered. After you have determined an /r/ variation (e.g., ear initial) that the student was stimulative for or could correctly produce, find the corresponding chapter of the Entire World of R™ Secret Message and use the appropriate section for practice. Keep a list of the correctly produced words in the production practice and write it on one of the Correctly Produced Word Lists.

5-Minute Kids™ Artic Therapy

A Drill Based Program for Individual Articulation Therapy!

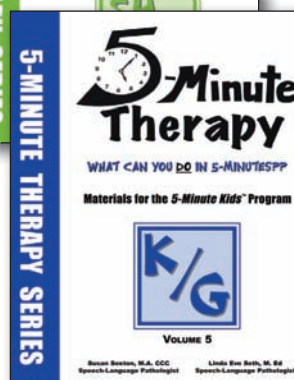

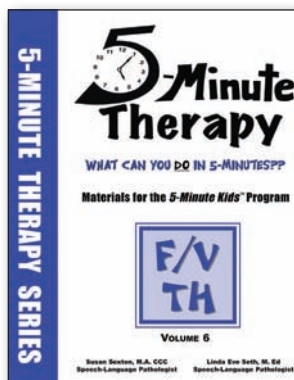

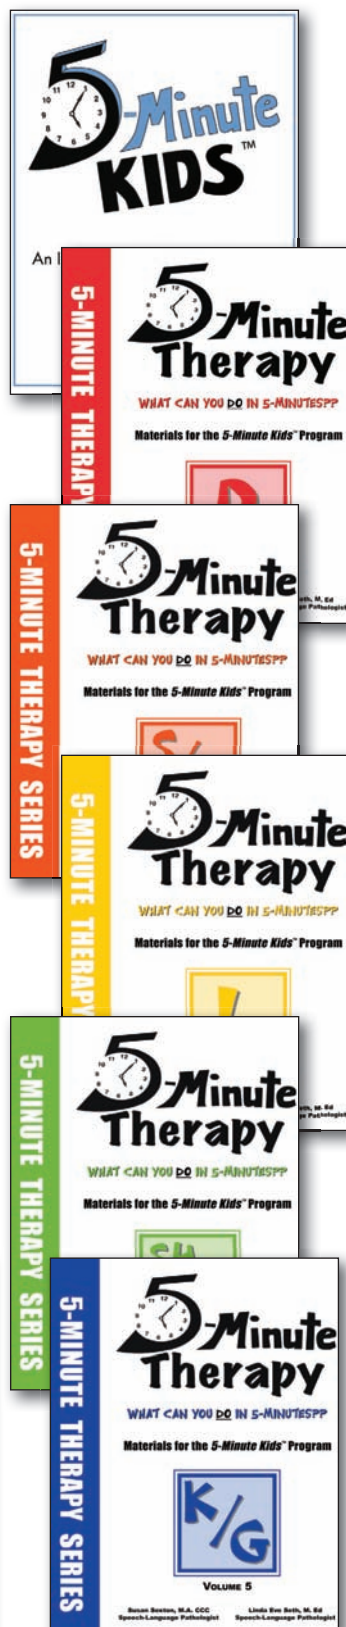

The 5 Minute Kids program is a creative, effective service delivery model for students working on articulation skills. Very often in traditional pull-out group therapy, students in the group alternate during the sessions between actively working on sounds with the SLP and passively waiting while others receive the direct instruction and practice.

5-Minute Kids™ is a clear, step-by-step program developed by a speech language pathologist to help children with speech sound disorders. The intent of this program is to minimize the amount of time that a child spends out of the classroom, and to improve the quality of time that the child spends working on individual speech sounds in therapy. A student enrolled in the 5-Minute Kids™ program receives individual therapy for five to seven minute sessions, two to four times per week. The child practices targeted speech sounds by repeating words, naming pictures, reading, and conversation. The suggestions for data collection and organization would also be beneficial for serving students using the RTL model.

Manual includes: step by step manual, a variety of data collection sheets, Pre and Post testing forms for S, R, L, SH, CH, K, G, TH, F and V, pictures for baseline word items. Grades: Pre-K and up.

Course 5900: Effective Evaluation and Intervention Procedures for Frontal and Lateral Lisp Disorders

Course description: This course will cover evaluation and intervention techniques for frontal and lateral lisp disorders. There are 22 variations or allophones for /s/ and /z/ which include initial and final /s/ blends, initial, medial and final /s/ and /z/. Evaluation is the key to discovering a “key” word or phrase which the student can produce successfully. This key word is the foundation for intervention. It is from this successful production that placement is achieved. The 2 tongue placements for /s/ and /z/ will be discussed along with tips for carryover and working with parents.

Course 5727: Yoga

Course description: Yoga and learning are a natural partnership. Many speech and language students have issues such as anxiety and sensory processing problems that can inhibit learning readiness. Yoga focuses on breath and mindful movements which help students with self-regulation skills, reduce anxiety and set the platform for effective learning.

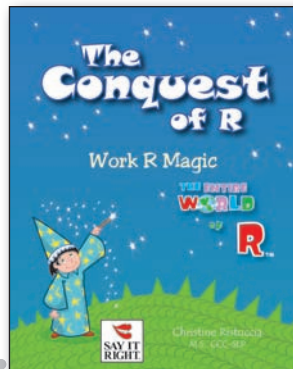

Course offered for CEUs through [SpeechPathology.com](http://www.speechpathology.com)

Conquest of R

The Conquest of R will help you probe deeper into the student's lack of progress in correct production of /r/ after being in traditional /r/ intervention. Learn to pinpoint student's correct productions and facilitating contexts using the Entire World of R Elicitation Probe which included in the Entire World of R Advanced Screening.

EWR-029...Conquest of R...\$34.99

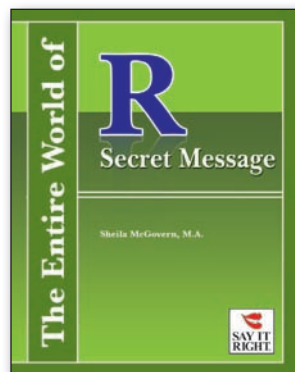

Secret Message

This book has been developed to help the student develop mastery of the /r/ variations while learning puzzles.

It is suggested that the student with the /r/ speech sound disorder be given the Comprehensive /r/ screening to determine which of the 32 variations of /r/ he has not mastered. After you have determined an /r/ variation (e.g., ear initial) that the student was stimulable for or could correctly produce, find the corresponding chapter of the Entire World of R™ Secret Message and use the appropriate section for practice. Keep a list of the correctly produced words in the production practice and write it on one of the Correctly Produced Word Lists in Appendix A (pp. 77–82).

R Trivia Books

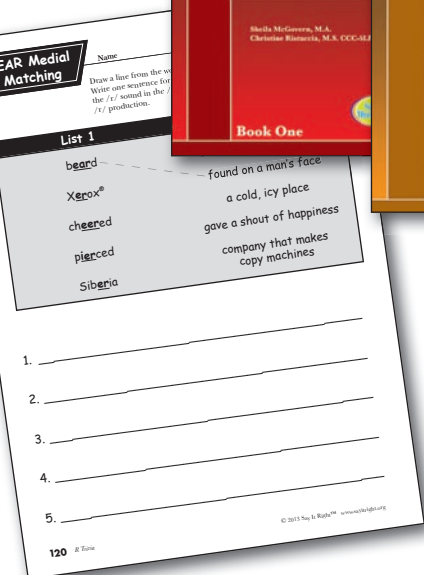

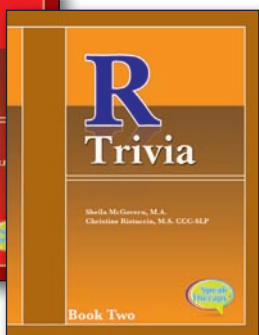

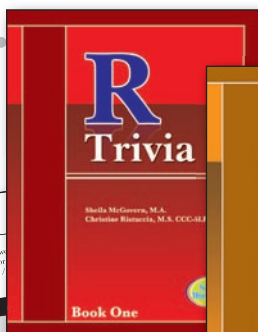

These books have been developed to help the student develop mastery of the /r/ variations while learning basic, everyday trivia. There are game cards, matching, fill in the blank, crossword puzzles and true/false to make learning fun for the student. At the end of each section are the answers for each activity.

The material used in these books was chosen as a way to interest students by focusing on non-fiction bits of trivia that are somewhat sophisticated. It is hoped that the student will find the information of interest as he/she simultaneously strengthens his command of the defective /r/ sound. Appropriate for 3rd grade and above. Also beneficial for middle and high school articulation practice.
